

Simply Better . . . by Design

The benefits of Controller Upgrade

- ▶ Is your existing controller giving problems?
- ▶ Does it have an outdated wash system?
- ▶ Does your controller meet current hygiene requirements?

Liscarroll Engineering offer an efficient, reliable and versatile solution that can be used on any bulk tank in the market today.

Liscarroll Controllers are designed to be **reliable, easy to use and service friendly.**

We offer 3 easy to use solutions to meet your specific requirements

LE-200 Standard controller
Standard controller managing cooling and wash function with backup thermostatically controlled Carel. One touch Descale and Quick Wash function built in.

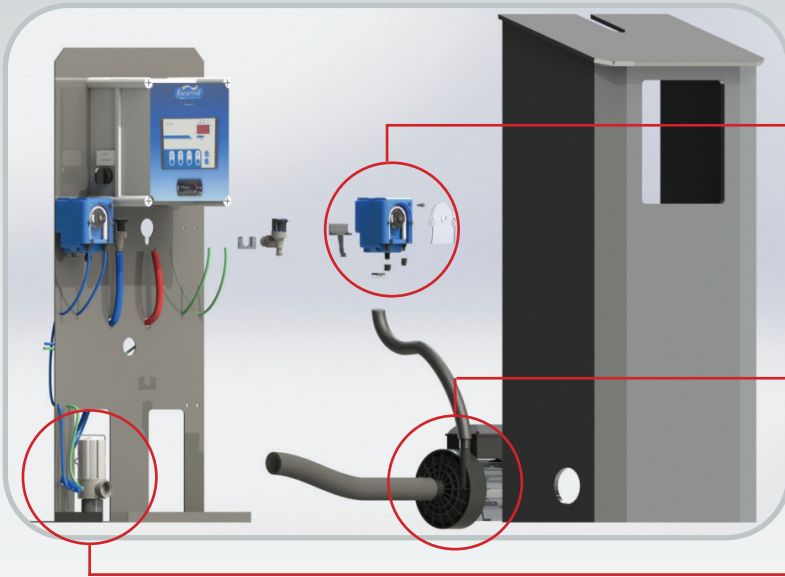

LE-200 PLUS with monitoring
Standard Controller with monitoring function that can incorporate text messaging if required. One touch descale and Quick Wash function as standard.

LE-300 Robotic controller with monitoring
With Robotic Interface, suitable for all robot models and with integrated tank monitor.

The Liscarroll Controllers explained.

Chemical Dosing Pump

- ▶ 3 Etatron dosing pumps
- ▶ Dosing pumps with adjustable flow control
- ▶ ECO wash facility option

Wash Pump

Standard SIREM Circulating Pump with built-in thermal overload protection

Muller Dump Valve

Etatron Chemical Dosing Pump

Sirem Wash Pump

Muller Dump Valve
